WORK EXPERIENCE

Pixelfarming Robotics

APRIL 2021 TILL NOW

Operator / Engineer

Pixelfarming is a company that innovates in agriculture with robot- and drone technology. I develop new (software) features for our robot, as well as operating and testing

Sociëteit 't Forum

MARCH 2023 TILL NOW

Bartender

For my student association, I have done 1 year of bartending, giving me lots of experience with customers and a busy working environment; when 200 beers are ordered, I know how to respond.

Promptus Imperii Study Association

JULY 2022 TILL JULY 2023

Head of activity committee

For my study association, I was involved organised all activities. This includes main responsibility for project management, budget management, business relationships, planning, time management and leadership.

Prodrive Technologies

August 2022 - January 2023

Software Engineer

Prodrive technologies is a high-tech supplier of parts for many important companies as ASML, Philips and Siemens. For my internship I implemented the CANopen communication protocol for their motion controllers.

VGR Group

MAY 2020 TILL MAY 2021

Research Precisionfarming

VGR Group is a company that maintains sports fields and golf courses. I have started research for a project in which we combine precision farming technologies into sports field and golf course management.

EDUCATION

Dundalk Institute of Technology

September 2023- January 2024

Erasmus exchange programme

As part of my graduation programme in the Netherlands, I should get 30 ECTS in any curriculum that is different than my current study (Technical Computer Science). To further develop and improve myself as a person, I chose to move to Ireland for 5 months and study Electrical & Electronic Engineering.

Avans Hogeschool Breda

JULI 2021

HBO Propedeuse Technische Informatica

I finished my first year's propaedeutic examination of the "Technische Informatica" Bachelor's degree with 60 ECTS and an average degree of 7.41.

Michael / Markenhage College

JULY 2021

HAVO

Michael College is a Waldorf school, which means that during my higher secondary general education I have learned several different creative skills. This means that I have a European portfolio containing extra certificates. For details about this portfolio, please feel free to contact me.

HOBBIES AND SKILLS

I have a passion for aviation and specifically, FPV drones. I have built and flown FPV drones since 2021 and I have participated in several simulator races. Also, I have a great passion for music. Both of my parents are professional musicians, so I have listened to and learned to make music since I was young. I have played and learned the drums for 5 years and self-taught guitar, bass guitar and Ableton (for electronic music).

Creating computer generated imagery (CGI) has also become one of my hobbies. In 2018, I started using Autodesk Maya, but I quickly switched to Blender and have been using it ever since. I used Blender to create most of the artworks that can be found on my portfolio website.
